An Examiner's Amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 C.F.R. §1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the Issue Fee.

Claims 1-55 and 61-80 were cancelled without prejudice to the filing of divisional or continuation applications.

Claim 56 has been replaced in its entirety by the following:

-- 56. A method for detecting a genetic polymorphism in a target nucleic acid comprising:

providing a mutant polymorphism oligonucleotide probe that is complementary to a region on the target nucleic acid that comprises the genetic polymorphism;

providing a universal oligonucleotide probe capable of binding to the target nucleic acid at a region that is conserved in the analogous wild-type nucleic acid;

wherein one oligonucleotide probe constitutes an upstream oligonucleotide having, as its 5'-end, a ribo- or deoxyribonucleoside wherein the 5'-hydroxyl group thereof has been replaced by a leaving group, and the other oligonucleotide probe constitutes a downstream oligonucleotide comprising, at its 3' end, a nucleoside comprising a 3' functional group selected from the group consisting of 3'-phosphoroselenoates such that, when both probes are bound to the target nucleic acid, an end of the universal oligonucleotide probe is substantially adjacent to an end of the mutant polymorphism oligonucleotide probe so as to position the 5' leaving group and the 3'-functional group in close proximity to one another;

contacting the target nucleic acid with the universal oligonucleotide probe and the mutant polymorphism oligonucleotide probe to yield an autoligated oligonucleotide product comprising the universal oligonucleotide probe and the mutant polymorphism probe; and

detecting the presence of the autoligated oligonucleotide product, wherein the presence of an autoligated product indicates the presence of a genetic polymorphism in the target nucleic acid. --

The following new claims have been added:

-- **81.** The method of claim **56** wherein the target nucleic acid is DNA. --

-- **82.** The method of claim **56** wherein the target nucleic acid is RNA. --

Authorization for this Examiner's Amendment was given in a telephone interview with **Ms. Victoria A. Sandberg** on November 9, 2005.

Papers related to this application may be submitted to Group 1600 via facsimile transmission (FAX). The transmission of such papers must conform with the notice published in the Official Gazette (1096 OG 30, November 15, 1989).
